Work experience

Frontend Developer

AYMO LIVE

Oct. 2021 – Present

Remote work, Croatia - Split

- Replaced the emoji selection library that buffered on slow internet users with a library that uses the sprite method and displays all emoji at once even for slow internet users.
- Created more than 20 new components in the UI library of the project, as well as refactored more than 10 components written by other developers thus improving code quality for future developers.
- Was a mentor for the intern and reviewed his code. I helped him to get into the development process faster, showed him the style of code in the company and introduced him to the regulations.
- Used Git in the team developing.
- Implemented form validation with Yup and Formik, which has improved form security and usability and helps multiple users sign up.

Projects

Riksha shop

React, Redux-toolkit, styled-components, react-loading-skeleton, axios
