## Summary

Creative Frontend developer with more than 1 year of successful experience in web application development. I am calculative, deeply analyze the task at hand, do not stretch the tasks. I strive to make the most optimized and responsive web applications using modern and up-to-date technologies. I always share my ideas that can potentially improve the web application and project.

## Skills

Language: JavaScript / TypeScript, HTML, CSS / SCSS, GraphQL / Apollo Client

Frameworks: React / React-Native, Vite, WebPack

Tool for development: Git, BEM, Mobile-first, npm, yarn, VS Code, Expo

Libraries: Redux/Redux-toolkit, React-Router-DOM, styled-components, Formik, Yup, Axios, emoji-picker, react-loading-skeleton

## Education

Kazakhstan International Linguistic College

Kazakhstan, Astana

Secondary professional education

2021 – 2024

## Work experience

Frontend Developer

Oct. 2022 – Dec. 2023

**AYMO LIVE**

Remote work, Croatia - Split

- The implementation of TypeScript was accompanied by active learning of new development practices and standards
- Improved usability by proposing and implementing a new library for Emoji display using sprites
- Active participation in the development of the new version of the website, implementation of new functionality and improvements
- Developed an authorization form with validation in a mobile app using React Native
- Fixed a bug with GraphQL because of which new messages in the live chat were not displayed, did a lot of code tweaking
- Active participation in team development using Git, including successful conflict resolution
- Used styled-components, custom hooks in development
- Implementation of authorization and registration forms using Formik and Yup validation, which ensured security and convenience for users
- Creating components in the UI of the project library
- Engaged in Code Review for interns, which helped improve the overall quality of the codebase

## Pet projects

Riksha shop

**React, Redux-toolkit, styled-components, react-loading-skeleton, axios**

- Lazy product loading, adding items to cart, calculating total cart value, changing the number of items in cart, animations, moving through pages, filtering/sorting items.

Todo app

**React-router-DOM, localStorage, uuid library**

- Ability to create and mark cases completed, go through pages (all, completed, uncompleted), save cases after page reloading, animations

Multi-step purchase form

**JS, HTML, SCSS, async/await, regexp**

- Animation of a successful "step", form validation, ability to customize the selected tariff/plan, ability to take a "step back"
